Table 5-1: Route 3 Interchange Alternative Screening Analysis

A		B				C		D	E	F	G
Alternative	Description	Impact on I-95/Route 3 Weaves				2040 Traffic and Operations on Proposed CD Lanes @ River Density (pc/mi/ln) and LOS		Requires New Signals on Route 3	Other Comments	Recommendation	Diagram
		Removes NB I-95 Weave	Removes SB I-95 Weave	Removes EB Route 3 Weave	Removes WB Route 3 Weave	Northbound CD Road 2040 ADT Peak Hour Density and LOS (AM/PM)[1]	Southbound CD Road 2040 ADT Peak Hour Density and LOS (AM/PM)[1]	Additional Delay & Resulting LOS (AM/PM)[2]			
Alternative 1 (Base Alternative)	+ Start 2-lane NB CD lanes at EB to NB on-ramp + End 2-lane SB CD lanes at SB to WB off-ramp + Extend EB to NB on-loop ramp acceleration lane 1000 feet past the NB to WB off-ramp	NO	NO	NO	NO	15,500 Density: 11.8 (B) / 7.0 (A)	38,000 Density: 10.2 (A) / 34.4 (D)	None	Considered the minimal improvement for NB I-95.	NOT RECOMMENDED FOR FURTHER STUDY due to: serving low volumes on NB CD lanes and does not eliminate any Route 3 weaves	Figure 5-1
Alternative 1B	Base Alternative + Signal at end of SB CD lanes + Free-flow right turn to Silver	NO	NO	NO	NO	15,500 Density: 11.8 (B) / 7.0 (A)	38,000 Density: 10.2 (A) / 34.4 (D)	No new east side signal New west side signal Delay: 21.6 sec (C) / 152.5 sec (F)	High delay at new signal is due to traffic backing up the SB CD road which also happens without the signal.	RECOMMENDED THAT IMPROVEMENTS BE INCLUDED IN ALTERNATIVES CARRIED FORWARD	Figure 5-1B
Alternative 2A	Base Alternative + Provide option to enter NB CD lanes from I-95, 400 feet north of NB to EB off-loop ramp	NO	NO	NO	NO	27400 + Density: 19.9 (C) / 12.1 (B)	38,000 Density: 10.2 (A) / 34.4 (D)	None	Potential problem if large numbers of I-95 traffic destined for Route 17 uses the slip ramp. Will make a very congested weave situation.	NOT RECOMMENDED FOR FURTHER STUDY due to: potential dangerous and congested weave	Figure 5-2A
Alternative 2B	Base Alternative + Provide EB US 17 off ramp from I-95, 2000 feet north of NB to EB off-loop ramp.	NO	NO	NO	NO	18,800 Density: 12.7 (B) / 8.6 (A)	38,000 Density: 10.2 (A) / 34.4 (D)	None	Creates a shorter weave between Route 3 on traffic and Route 17 off traffic.	NOT RECOMMENDED FOR FURTHER STUDY due to: potential congested weave that would be created between Route 3 traffic entering the interstate and Route 17 traffic exiting the interstate.	No Diagram
Alternative 3A	Base Alternative + Remove EB to NB on-loop ramp and replace with triple lefts	YES	NO	YES	NO	46,800 Density: 47.4 (F) / 18.7 (C)	38,000 Density: 10.2 (A) / 34.4 (D)	New east side signal Delay: 16.3 sec (B) / 16.3 sec (B) No new west side signal	May require widening NB CD Road to 3 lanes	RECOMMENDED FOR FURTHER STUDY due to: good usage of CD lanes, eliminates some weaves, modest cost increase over Base condition, minimal increases in delay for Route 3	Figure 5-3A
Alternative 3B	Alternative 3A + Remove WB to SB on-loop ramp and replace with dual left turns	YES	YES	YES	YES	46,800 Density: 47.4 (F) / 18.7 (C)	38,000 Density: 10.2 (A) / 34.4 (D)	New east side signal Delay: 25.0 sec (C) / 16.5 sec (B) New west side signal Delay: 42.0 sec (D) / 7.4 sec (A)	May require widening NB CD Road to 3 lanes	NOT RECOMMENDED FOR FURTHER STUDY due to: significant additional delay for EB Route 3	Figure 5-3B
Alternative 4A	Base Alternative + Remove NB to WB off-loop ramp and replace with dual left turn from NB off-ramp + Relocate EB to NB on-ramp between bridge piers and abutment + Provide slip ramp between EB to NB on-ramp and NB CD lanes	YES	NO	YES	NO	27,400 Density: 19.9 (C) / 12.1 (B)	38,000 Density: 10.2 (A) / 34.4 (D)	New east side signal Delay: 14.3 sec (B) / 42.9 sec (D) No new west side signal	Requires barrier between mainline and EB Route 3 to NB I-95 on-ramp.	RECOMMENDED FOR FURTHER STUDY due to: good usage of CD lanes, eliminates some weaves, modest cost increase over Base condition, minimal increases in delay for Route 3	Figure 5-4A
Alternative 4B	Alterantive 4A + Remove SB to EB off-loop ramp and replace with left turn from SB off-ramp	YES	YES	YES	YES	27,400 Density: 19.9 (C) / 12.1 (B)	51,700 Density: 15.2 (B) / 58.0 (F)	New east side signal Delay: 15.7 sec (B) / 14.1 sec (B) New west side signal Delay: 16.9 sec (B) / 15.6 sec (B)	Requires widening SB CD Road to 3 lanes	NOT RECOMMENDED FOR FURTHER STUDY due to: Requires widening SB CD Road to 3 lanes	Figure5- 4B
Alternative 5	Base Alternative + Diverging Diamond at Route 3 with free-flow or signal-controlled ramps	YES	YES	NO	NO	46,800 Density: 47.4 (F) / 18.7 (C)	51,700 Density: 15.2 (B) / 58.0 (F)	New east side signal Delay: 22.7 sec (C) / 54.3 sec (D) New west side signal Delay: 174.2 sec (F) / 123.1 sec (F)	Requires widening SB CD Road to 3 lanes Through volumes on Route 3 exceeds capacity of cross-over signal.	NOT RECOMMENDED FOR FURTHER STUDY due to: New west side signal is expected to operate at LOS F add significant delay to Route 3 traffic. Maintains weaves on Route 3	Figure 5-5
Alternative 6	Continuous CD lanes through Route 3 in both directions	YES but still on CD Road	YES but still on CD Road	NO	NO	46,800 Density: 47.4 sec (F) / 18.7 sec (C)	51,700 Density: 15.2 (B) / 58.0 (F)	None	May require widening NB CD Road to 3 lanes Requires widening SB CD Road to 3 lanes Requires rebuilding Route 3 bridges	NOT RECOMMENDED FOR FURTHER STUDY due to: requires three lane CD Roads and does not completely eliminate any weaves at Route 3	Figure 5-6
Alternative 7	Alternative 3B + Move braided ramps from north of River to between Route 3 and Cowan Blvd	YES	YES	YES	YES	37,800 Density: 24.9 (C) / 20.0 (C)	38,000 Density: 10.2 (A) / 34.4 (D)	New east side signal Delay: 16.3 sec (B) / 16.3 sec (B) No new west side signal	Does not require 3 lanes on NB or SB CD Roads	NOT RECOMMENDED FOR FURTHER STUDY due to: requires reconstruction of Route 3 bridges	Figure 5-7
Alternative 8A	Alternative 7 + EB to NB Flyover Ramp	YES	NO	YES	NO	37,800 Density: 24.9 (C) / 20.0 (C)	38,000 Density: 10.2 (A) / 34.4 (D)	New west side signal (SB to EB) Delay: 7.0 (A) / 8.0 sec (A) New far west side signal (SB to WB ramp) Delay: 11.1 sec (B) / 485.7 sec (F)	High delay at new far west signal is due to traffic backing up the SB CD road which also happens without the signal. This is a potential longer-term solution that can be added to Alternative 7.	NOT RECOMMENDED FOR FURTHER STUDY due to: high construction cost and lower cost intermediate solutions exist; Regional bypasses could alleviate some of the need for the flyover.	Figure 5-8A
Alternative 8B	Alternative 3A + EB to NB Flyover Ramp	YES	NO	YES	NO	46,800 Density: 47.4 (F) / 18.7 (C)	38,000 Density: 10.2 (A) / 34.4 (D)	No new east side signal New west side signal Delay: 21.6 sec (C) / 152.5 sec (F)	This is a potential longer-term solution that can be added to Alternative 3A.	RECOMMENDED FOR FURTHER STUDY due to: alternative with most improvement to Route 3 operations.	Figure 5-8B

1. CD Road LOS Shading
Green shading indicates LOS A, LOS B, or LOS C for both peak hours
Yellow shading indicates LOS D for at least one peak hour
Red shading indicates LOS E or LOS F for at least one peak hour

2. Intersection LOS Shading
Green shading indicates NO NEW SIGNAL
Yellow shading indicates a new signal with LOS A, LOS B, or LOS C for both peak hours
Red shading indicates a new signal with LOS E or LOS F for at least one peak hour

AM Volume (PM Volume) [Daily Volume]

2,000 1,000 0 2,000 Feet

Note: Intersection volumes may not exactly balance between intersection due to driveways and variance in actual peak hour (worst case analyzed)
